The Center of Disease Control recommends that “school staff should routinely clean areas that students and staff touch often” such as; **desks, tables, chairs, countertops and touch surfaces.**

The “**Pre Treat Pad System**” cleans safer and faster than any other hard surface cleaner. Results are cleaner safer buildings

PRE-TREAT PAD SYSTEM CHART

8 QUICK & EASY STEPS TO A CLEANER AND HEALTHIER ENVIRONMENT.

STEP 1

SOLUTION MIX

Measure correct amount of solution. See chart below for proper dilution rates.

STEP 5

FLIP BUCKET

Flip bucket with lid on and allow to set in this position for 15 minutes.

STEP 2

LOAD PADS

Place pads in bucket microfiber side down. Top mop microfiber side up to prevent splashing.

STEP 6

INSTALL PAD

Flip bucket and remove lid. Install pad on pad frame.

STEP 3

ADD SOLUTION

Pour solution evenly over pads.

STEP 7

CLEAN SURFACE

Clean water safe surfaces.

STEP 4

SEAL BUCKET

Place lid on bucket, making sure all 4 corners are sealed tightly.

STEP 8

LAUNDER PADS

Place dirty mops in proper laundry receptical.

MICROFIBER PAD MIXING CHART

12 pads	.37 gallons	1.4 liters
18 pads	.50 gallons	1.9 liters
24 pads	.75 gallons	2.8 liters
36 pads	1.0 gallons	3.8 liters
